Profile

Has taught electronics since 2023, alongside the degree rather than after it. Leads SPAW 3.0, a six-session embedded systems and entrepreneurship curriculum for secondary school students, and instructs a practical electronics workshop for students with no prior background. Completed an internship on Chevron Nigeria's electrical and instrumentation team.

Education

B.Sc. Electronic and Electrical Engineering 2021–2027 (expected)

Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria

Relevant coursework: Control Systems, Measurement and Instrumentation, Digital Electronics, Signal Processing, Power Systems, Microprocessors and Embedded Systems, Electronic Circuit Design.

Leadership and Community Impact

SPAW Project Lead and Syllabus Team Lead 2024–Present

IEEE OAU Student Branch

- Lead SPAW 3.0, a six-session embedded systems and entrepreneurship curriculum for secondary school students.
- Design all lesson plans, tutor guides and laboratory exercises for the programme.
- Coordinate volunteer tutors across the six sessions.

Core Instructor 2023–Present

Circuit Zero to Hero (ZTH)

- Run practical electronics workshops for students who have never built a circuit.

Editorial Team Member 2023–Present

EEE Students Society (EEESS), OAU

- Contribute to editorial output for the Electronic and Electrical Engineering Students Society.

Content Strategist 2024–Present

EEE Department Social Media Committee (TikTok / Instagram), OAU

- Plan and produce content for the department's TikTok and Instagram channels.

Campus Ambassador 2023–Present

Cowrywise

- Advocate financial literacy on campus as a Cowrywise campus ambassador.

Experience

Embedded Systems and EEE Tutor 2023–Present

Astar Tutorials, Ile-Ife, Nigeria

- Teach circuit analysis, digital logic and microcontroller programming to engineering undergraduates.
- Sessions are sequenced so the theory arrives just before a student needs it to make a circuit work.

Facilities Engineering Management Intern (SIWES) Apr–Sep 2026

Chevron Nigeria Limited, Lagos, Nigeria

- Rotated through the Electrical and Instrumentation (E&I) team on field instrumentation and electrical systems.
- Hazardous area classification, arc flash awareness, bonding and grounding.
- Chevron compliance training via Workday: Operational Excellence, Cyber Security, Data Privacy, Business Conduct and Ethics.

Research and Development Intern (SIWES) 2024

ACE Quanser Robotics Lab, Obafemi Awolowo University, Ile-Ife, Nigeria

- Operated three Quanser platforms in MATLAB and Simulink: the QDrone quadrotor, the QCar ground vehicle, the QArm 6-DOF manipulator.
- Gave the lab orientation talk on the Quanser Aero 2: architecture, control principles, safety.

Projects

AI-Powered Smart Attendance System Feb–Mar 2026

Python, OpenCV, YuNet, SFace

- Defended it at the final-year project review; invited afterwards to build a production version.
- CSV and PDF export, because the records have to reach the systems a department already runs on.

github.com/ayomide-abilewa/Smart-Attendance-System

Multispectral Acquisition Device for Hydroponics 2025

ESP32, GY-2561, GY-31, I2C

- Light is the one input a hydroponic grower controls, so it is measured continuously rather than spot-checked.

Smart Temperature-Controlled Fan 2024

Arduino, C++, PWM, NTC thermistor

- First time leading a team through a hardware build rather than joining one.

Training and Certifications

Operational Excellence Training, Chevron 2026

Cyber Security and Data Privacy Awareness, Chevron 2026

Business Conduct, Ethics and Conflict of Interest, Chevron 2026

Robotics Lab Orientation and Operations, ACE Quanser Lab, Obafemi Awolowo University 2024

Technical Skills

Programming: Python, C/C++, MATLAB, JavaScript, Verilog/HDL, Bash
