PROFILE

Electronic and electrical engineering student at Obafemi Awolowo University, teaching electronics since 2023 alongside the degree. Currently interning on Chevron Nigeria's electrical and instrumentation team. Leads SPAW 3.0, a six-session embedded systems and entrepreneurship curriculum for secondary school students, and instructs a practical electronics workshop for students with no prior background.

EDUCATION

B.Sc. Electronic and Electrical Engineering · Obafemi Awolowo University 2021–2027 (expected)
Ile-Ife, Osun State, Nigeria
Relevant coursework: Control Systems, Measurement and Instrumentation, Digital Electronics, Signal Processing, Power Systems, Microprocessors and Embedded Systems, Electronic Circuit Design.

LEADERSHIP AND COMMUNITY IMPACT

SPAW Project Lead and Syllabus Team Lead · IEEE OAU Student Branch 2024–Present

- Lead SPAW 3.0, a six-session embedded systems and entrepreneurship curriculum for secondary school students.
- Design all lesson plans, tutor guides and laboratory exercises for the programme.
- Coordinate volunteer tutors across the six sessions.
- Produce structured PDF session materials including circuit diagrams, code examples and troubleshooting guides.

Core Instructor · Circuit Zero to Hero (ZTH) 2023–Present

- Run practical circuit design and electronics workshops for students with no prior background in the subject.

Editorial Team Member · EEE Students Society (EEESS), OAU 2023–Present

- Contribute to editorial output for the Electronic and Electrical Engineering Students Society.

Content Strategist · EEE Department Social Media Committee (TikTok / Instagram), OAU 2024–Present

- Plan and produce content for the department's TikTok and Instagram channels.

Campus Ambassador · Cowrywise 2023–Present

- Advocate financial literacy on campus as a Cowrywise campus ambassador.

EXPERIENCE

Embedded Systems and EEE Tutor · Astar Tutorials 2023–Present
Ile-Ife, Nigeria

- Teach circuit analysis, digital logic and microcontroller programming to engineering students.
- Design structured tutorial sessions, sequencing theory and hands-on exercises so students build working circuits.

Facilities Engineering Management Intern (SIWES) · Chevron Nigeria Limited Mar 2025–Present
Lagos, Nigeria

- Rotate across the Electrical and Instrumentation (E&I) team, working on oil and gas field instrumentation and electrical systems.
- Apply electrical safety practice including arc flash awareness, bonding and grounding.
- Completed Chevron compliance training in Operational Excellence, Cyber Security, Data Privacy, Business Conduct and Ethics, and Conflict of Interest via Workday.
- Maintain a structured SIWES logbook documenting field observations and system walkthroughs.

Research and Development Intern (SIWES) · ACE Quanser Robotics Lab, Obafemi Awolowo University 2024

Ile-Ife, Nigeria

- Operated the QDrone quadrotor UAV, QCar autonomous ground vehicle and QArm 6-DOF manipulator using MATLAB and Simulink.
- Delivered a technical orientation presentation on the Quanser Aero 2 covering system architecture, control principles and laboratory safety.

PROJECTS

AI-Powered Smart Attendance System · Python, OpenCV, YuNet, SFace

Feb – Mar 2026

- Defended the system at a final-year group project review and was invited to develop an extended production version.
- Designed the system around a lecturer's workflow, including CSV and PDF export so records integrate with existing institutional processes.

github.com/ayomide-abilewa/Smart-Attendance-System

Multispectral Acquisition Device for Hydroponics · ESP32, GY-2561, GY-31, I2C

2025

- Applied instrumentation to hydroponic growing, where light intensity and spectrum are the controllable inputs.

Smart Temperature-Controlled Fan · Arduino, C++, PWM, NTC thermistor

2024

- Led a project team for the first time, coordinating a group through a hardware build.

TRAINING AND CERTIFICATIONS

- Operational Excellence Training. Chevron, 2025.
- Cyber Security and Data Privacy Awareness. Chevron, 2025.
- Business Conduct, Ethics and Conflict of Interest. Chevron, 2025.
- Robotics Lab Orientation and Operations. ACE Quanser Lab, Obafemi Awolowo University, 2024.

TECHNICAL SKILLS

Programming: Python, C/C++, MATLAB, JavaScript, Verilog/HDL, Bash
